Greeting and philosophical thoughts	1
Camp Hope-for-the-Hopeless – some glimpses	3
Types of illnesses	4
Normal human being – structure and nature	4
Principles to remember	6
CASE 1 – hydrocephalus after surgery – Graphites	8
Mind of pathology	11
CASE 2 – SOL cerebellum – Lachesis	12-18
Growth and destruction – explanation embryology	13
08.09.2017 – Dr. Ambrish Vijayakar	
CASE 3 – rheumatoid arthritis – Calcarea carbonica	19
Materia medica – Calcarea carbonica – syphilitic phases	23
CASE 4 – gall stones – Lycopodium	25
09.09.2017 – Dr. Ambrish Vijayakar	30
CASE 5 – atopic dermatitis – Chamomilla	31
Questions	36
09.09.2017 – Dr. Prafull Vijayakar	38
CASE 6 – sclerosis of brain and mental retardation – Fl-ac	39-43
Cesarean section	40
Example – case of hemangio-endothelioma – Mercurius corr.	44
CASE 7 – excessive weakness and dreams of snakes in pregnancy, IUGR – Lachesis	46
09.09.2017 – Dr. Ambrish Vijayakar	
CASE 8 – behavioral disorder – Mercurius iodatus flavus	52
Example – case of acute bronchial congestion – Sulphur iodatum	57
Questions	58
10.09.2017 – Dr. Ambrish Vijayakar	60
CASE 9 – convulsions – Opium	61
	67

10.09.2017 – Dr. Prafull Vijayakar

The NEED	68
CASE 10 – SOL brain, no eye sight – Platina	70-76
Development – embryo to full grown child	74
Questions – answered by Dr. Ambrish Vijayakar	76
Reasons for failure – examples, explanations	77
Questions	82

10.09.2017 – Dr. Ambrish Vijayakar

CASE 11 – convulsions – Tarentula cubensis	85
Example – case of convulsions – Cenchrus	89
Syphilitic entry points	90

11.09.2017 – Dr. Prafull Vijayakar

CASE 12 – endometriosis, ovarian cyst – Psorinum	92
CASE 13 – live – Down syndrome – Chocolate	98
Questions	102

10.09.2017 – Dr. Prafull Vijayakar

In our endeavor to take Homoeopathy higher and higher, we try to go deeper and deeper into the human being.

Once all of you understand the language of the human body in which he tries to tell you what he is suffering from, nobody can stop Homoeopathy from becoming the best science in this world. Nobody will have the guts to criticize as it is happening now in India. Many of the allopaths finally had to resort to homoeopathic treatment when their own kin fell ill.

The only way to beat the old school is, to show them results in what they call as incurable cases. We don't have to use syphilitic aggression, just show them results.

The next case is of a young man with a cyst in the brain, which was operated.

When a body produces a SOL (cyst, tumor etc.), it is always with a purpose; the need of the constitution had to be there. What made the constitution develop such pathology, that he had to lose his eye-sight and his balance? This is the causative factor. Even after they cut the cyst off, he lost his memory, his balance and his eye-sight. WHY? What was it that he did not want to see?

You have to apply the Miasms everywhere!

Site affected	Psora	Sycosis	Syphilis
	Physiology, sensitivity	Barrier	Destruction
EYE / VISION	Eyes become sore / irritation / conjunctivitis / inflammation – only sensitive people will suffer – ready to fear – anxiety puts down the resistance (the more the anxiety, the more severe the inflammation)	Photophobia - closes eyes, lids become a barrier Thickness – sclera Cataract Glaucoma Try to protect the delicate retina	Detachment of retina

Psora/inflammation affects mostly the outer parts, but it can also go deeper if it is suppressed by antibiotic creams and drops → a chronic inflammation occurs and the body is trying to shield the retina → thickness, cataract etc. Later the inflammation gets so much that the blood vessels increase (Sycosis) and the retina will get detached (Syphilis).

In case of a glaucoma (increased pressure inside the eyes = Sycosis) it is very dangerous to take eye drops to suppress the pressure. At this point the patient is already in Sycosis – there has to have been Psora (sensitivity = trauma, inflammation, physical or mental) before. Physical trauma can occur because of too bright light or sun. In order to prevent detachment the body increases the pressure to keep the retina in place = defense mechanism. We have to remove the sensitivity, the cause – then the pressure will go to normal again.

Example

A boy (son of an allopathic doctor) tried to touch a fire cracker; it burst and burnt his eyes and face. In the beginning his left eye was not so badly injured, only inflamed. At the hospital they treated his burns with local application and the inflammation was transferred inside. So later there was limbal ischemia, total epithelial ischemia (Sycosis) and scarring (Syphilis). His face improved, but he developed a blurred vision in the left eye and a blind spot in the center in form of a band. Doctors told him, this scar will never go away and this made him come for Homoeopathy.

During treatment the inflammation had to come to the outside again; the skin had to go bad first before healing again.

THE NEED

Every person is born with a need: LOVE, RESPECT, SUPPORT (Immaterial).

Every living thing on this earth and universe wants to live.

Every living thing has a basic need.

Biological needs are: AIR, WATER, FOOD (Material).

§ 9 – *The immaterial (dynamis, autocracy) rules the material body with unbounded sway...*

If either of these needs is not satisfied the living being feels INSECURE and if the need eludes him completely → traumatized.

Everything in this world has a cause – if you are born in this world you have a purpose, you are not here by chance. There was a need which was formed before you were born.

TRAUMA is the first step towards ILLNESS.

INSECURITY AND TRAUMA are the cause of all the illnesses in this world.

But survival of the fittest is the rule of the world and every being FIGHTS for SURVIVAL in its own way.

As a physician if we want to rectify any illness, we have to find the NEED.

- What hurts or what has hurt the living being or what did he want and not get? (Ailment from)
- What is this constitution SENSITIVE to?
- What is the REACTION or how does this person fight to survive? Physiological, growth or destruction

For survival of self we need energy, for energy we need air, water and food.

PSORA means – CYCLES of NEEDS to survive

- Oxygen cycle
- Carbon dioxide cycle
- Nitrogen cycle
- Water cycle etc.

The living organism is traumatized, when there is a discontinuity in the cycle and the NEED is not satisfied.

Trauma can be

- Mental
- Physical
- Medical
- Cosmic

The organism defends by

1. Changes in physiology – psoric defense
2. Structural thickening, loosening, growth – sycotic defense
3. Structural destruction, distortion – syphilitic defense

→ Psora is the need, the sensitivity
→ Psoric defense comes from the need not getting fulfilled; gives rise to physiological changes → psoric illnesses

If somebody needs love and the love is not there from the parents, the need is not satisfied and the child starts looking for love somewhere else (other family members, friends, even false friends etc.). First it goes into psoric defense, but later it becomes sycotic and the child will start to deceive or do anything to get that love. Lack of psoric love can send a person right up to drug addiction; they are so sensitive and want to forget about all this, so they get high and try to cut off from the world.

If a child is put into boarding school but wanted to have the support of family, the trauma starts. From there the abandoned feeling comes from. “In spite of having parents I felt like an orphan (Magnesia).” A real orphan usually does not require Magnesia, it is more the feeling of being an orphan.

Example

A small boy who could not tolerate milk at all – an enzyme was missing, so he could not digest milk – genetic mutation had taken place. He was the child from a gay couple born from a surrogate mother. The mother was not giving signals that she was caring for the baby in her womb, for her it was just a job and during 6th-7th month she even was in discussion with another couple to carry their child after finishing this pregnancy. He felt abandoned, forsaken, there was no bond to the mother. The child “refused” to digest her milk. He got Mag-m and everything was fine again, because the thought process was corrected.
